

These are exciting times at Skeeter. While we are proud of the fact that many of our products have become industry standards, that's not enough for us. We're always driven to create a better fishing experience. This means constantly innovating, refining, and improving on the foundation we've built since 1948. It means new designs, new materials, and, ultimately, new ways to make each day on the water the best you've ever had.

Let me briefly touch on two examples of our most recent innovations. The all new FXR series is one of our biggest stories this year. We engineered it from the ground up in hopes of creating a boat that will change the way anglers fish and make their time on the water even more productive.

The other big news is the latest addition to our SX family, the SX2550. With two options available, the SX2550 Fish and the SX2550 Family, this is not only the largest bay boat we manufacture, but also one of the most diverse. We loaded both options with features, and left plenty of room for customization.

In 2019, we were also honored to be included in the 2019 Progressive® Insurance Minneapolis Boat Show® Innovation Awards for the introduction of our WX2200, the biggest Deep-V we've ever produced.

The boats in the 2020 catalog represent more than 70 years of experience, knowledge, and innovation. With more than 300 employees committed to reaching new heights, we feel confident that the products we bring to market represent our continued dedication to excellence, and that you and your family will reap the benefits of our efforts as you find joy on the water.

Sincerely,

Jeff Stone

*Sr. Vice President/General Manager, Skeeter Products, Inc.*

# OUR PASSION IS BUILDING SUPERIOR FISHING BOATS.

No other boat manufacturer boasts the rich history and heritage of Skeeter.

For over seven decades, generations of anglers have trusted Skeeter for their best fishing memories. Our production process uses advanced manufacturing techniques and materials, many of which were first used in aerospace applications. Skeeter's X-Treme and EX-Cell composite construction ensure a smooth, dry, and safe trip to your favorite fishing hole.

*Eat. Sleep. Fish.*

1975

## FIRST V-BOTTOM BOAT

Skeeter introduces the first V-bottom bass boat and sets a new standard in boating performance, bringing high performance and gaining popularity in the then-fledgling bass circuits.

1996

## YAMAHA

Skeeter is acquired by Yamaha Boat Company, teaming our innovative designs with the most technologically advanced outboard engine company in the world.

1948

## HOLMES THURMOND

In 1948, the first Skeeter Bass Boat, believed to be the first bass boat ever, is built by Holmes Thurmond in Shreveport, Louisiana.

1983

## COLEMAN

The Coleman Company, already famous for their camping equipment, purchased Skeeter and our Fish 'n' Ski series was launched. That year, we also introduced the first SX bass model, beginning a line of boats that's become the choice of thousands of fishermen.

2000s

## TORQUE TRANSFER SYSTEM

With the introduction of an all new Torque Transfer Transom, we set the industry precedent for modern construction.

1950s

## FIRST TO USE FIBERGLASS IN BOATS

We introduce fiberglass into our boats' construction, making it possible for more sizes and styles of boats to be produced in larger numbers, while maintaining the quality we are known for.

1990

## FIRST DEEP-V BOAT

Our line of Deep-V boats achieved greater recognition when the walleye model took the triple crown at Angler of the Year in all three major walleye professional tour circuits.

2010

## THE FX SERIES

Breaking barriers and building the dream of a bass boat all others are measured against lead to the introduction of Skeeter's FX Series. This line-up of the FX20 and FX21 redefined the standard for the tournament angler, providing a competitive edge on the water.

2020

## FISHING BOAT? FAMILY BOAT?

INTRODUCING THE PERFECT BOAT FOR WHAT YOU LIKE.

**SX  
2550**

1961

**STEMCO MARINE**

Ben Cook, co-founder of Stemco Corporation, acquires Skeeter patent rights and moved the plant to Longview, Texas. During the mid-60s, we saw greater demand for bigger boats, more horsepower, and greater control at high speeds.

1992

**THE ZX SERIES  
AND FIRST BAY BOAT**

Our innovative ZX series is unveiled, combining a level of performance and set of features never seen before. It became and is still the #1 selling line in Skeeter history.

2017

**SKEETER BUILT® TRAILERS**

We open a 43,000 square foot facility in Kilgore, Texas, enabling us to build our own high-quality, innovative, Skeeter Built® trailers in-house.

# **SX2550** WE MADE IT VERSATILE. YOU'LL MAKE IT YOUR OWN.

Available in either a Fishing package or a Family package with a stylish T-top, this is the boat we've always wanted to build and you've always wanted to own. Both packages are loaded with unique features and industry-leading innovations you've come to expect from Skeeter.

## **OVERSIZED CONSOLE**

Features a full width and height side entry door. Large enough to add a portable toilet or serve as a changing room. Custom breaker panel and large access panel can also be found in the console.

## **REAR BENCH SEAT**

Between the jump seats, we added an easily removable cushion with backrest to provide extra seating above the rear livewell. Flip up the jump seat pads to reveal easy access to the battery compartments.

## **FORWARD SEATING**

On those days when the fish aren't biting, it's easy to configure the forward seating with a sun pad. If you're not catching fish, catch some rays.

## **LEAN POST BACKREST**

Leaning post features thigh rise bolsters and arm rests. Color matching helm comes standard with hydraulic tilt steering, fatigue reducing EVA padded foot rest and cockpit sole.

# GET THE HULL PICTURE.

TO US, "SLIP," "SLIDE" AND "SKIP" are the worst kind of four-letter words. In tournament conditions or just cruising the bay, you never know when you'll need to turn on a dime. That's why Skeeter's control is legendary. We start with NMMA®, U.S. Coast Guard, and American Boat & Yacht Council standards, then go above and beyond to achieve the ultimate in performance and safety.

## SX SERIES

### HULL PERFORMANCE OVERVIEW

#### PERFORMANCE DESIGN

Our deep-V hull has a performance deadrise designed to cut through chop. This works with the unique primary reverse chines to keep you dry, and ensure a smooth ride.

#### FLOATS SHALLOW

Our inshore boats are designed to run shallow. Engineered with balance, your Skeeter will run where the fish are, but get you out when the tide changes.

#### FOUR SECONDS

With our unique design and the power of your Yamaha outboard, you'll be up on plane in a matter of four seconds.

#### SX2550 FAMILY / SX2550 FISH

Its larger Carolina flair hull forces water away from the SX2550, so you have a smoother and drier ride, even in bigger water. Deeper V-hull, higher gunwales, and the optimal deck layout.

#### SX240 / SX230

When it comes to hulls, bigger is better. This one is solid, able to take rough chop well, then remain stable when you're fishing.

#### SX2250

Versatility redefined. With a deeper V-hull, higher gunwales, and optimal deck layout, the SX2250 is great for shallow waters, trolling, or rig fishing.

#### SX210 / SX200

Runs wide open on skinny water, then slides into the shallows without missing a beat. Smooth performance from standstill to top-end.

BOATS SHOWN MAY INCLUDE DEALER INSTALLED OPTIONS NOT AVAILABLE FROM THE FACTORY.

# THE NEXT GENERATION

## IN OFFSHORE POWER IS HERE.

### 4.2 Liters of Reliability and Dependability

The power you need, with the reliability you demand. With Yamaha's legendary four stroke series, you can leave your anxiety at the dock. Yamaha outboards are designed to the last detail – engineered to give you the ultimate technology for performance, power, acceleration, fuel efficiency, and reliability.

## OVER 20 YEARS WITH

**"If you are going to make it,  
make it the very best there is."**

– Genichi Kawakami, *Yamaha Motor's first president.*

From the beginnings of Yamaha Motor Corporation in 1953, the stage was set for success through a vision of innovation. Only a few years before that, Holmes Thurmond built the first bass boat, designed upon many of the very characteristics of today's bass boats – stability, shallow draft, room for tackle and gear and easy movement around the inside of the boat. His boat was dubbed a "Skeeter," because of its long, needle-shaped nose that resembled a mosquito. These two joined forces in 1996, when

## YAMAHA POWER

### THE FUTURE OF BAY BOAT POWER.

It's the first of its kind—a V-6 big-bore four stroke outboard for deep-v boats and it's outperforming competition two strokes with:

- Up to 13% quicker hole shot
- 4.2 liter, big-bore displacement and power-to-weight ratio
- Next generation technology that's lighter than previous V6 two strokes and four strokes.
- It's also delivering clean-burning power and a level of fuel efficiency anglers never thought they'd see out on the open water.

Yamaha Motor Corporation purchased Skeeter. Throughout the past 20 + years, Skeeter has introduced the next generation of bay boats, including the SX2550. These boats have also served as the platform for Yamaha's four-stroke SHO engine technology – combining a powerhouse in boating and fishing. Along the way Yamaha motors have been keeping the Skeeter bay boat ahead of the pack with unmatched performance and reliability.

# DESIGN AND MANUFACTURING

INGENUITY AND  
INNOVATION  
IN ENGINEERING.

**First, we call on science** – It's an art. It's a science. Boaters and anglers ourselves, the team that builds each and every Skeeter boat is committed to innovation and engineering, with the highest level of quality. Our boats are engineered, designed, prototyped, and tested to the max. Want to see this first-hand? Call us to schedule a factory tour!

## A AEROSPACE COMPOSITES

For some of the industry's strongest fiberglass hulls: the transom, stringers, and floor utilize aerospace derivatives known as EX-Cel composites, which provide outstanding strength and durability. Unlike our competitors, we only use foam for flotation and build the strength into our extra thick hull and deck sides using our unmatched fiberglass lamination process.

## B TORQUE TRANSFER SYSTEM

This revolutionary system, exclusive to Skeeter, is constructed of high-test aircraft grade structural aluminum bolted through our full width, EX-Cel composite transom. It is designed to transfer the tremendous energy and stress developed by the thrust of today's high torque outboards to the bottom structure of the hull.

*Only available on the SX2550, SX240, SX230, and SX210.*

## C PROTECTING YOUR GEAR

We know you invest heavily in your gear, so we use a vacuum-infusion process with state-of-the-art materials on our hatches, latches and storage areas to keep your gear safe and dry. Specialty glass and resins combine with PVC cross-linked foam core to make hatches lightweight, insulated, and protected from the often harsh saltwater environment.

## D CONSOLE FOR EVERYTHING

Our hand-lamination process using fiberglass and resin materials, along with Armorcoat Technology, makes our SX Series consoles tight like a safe. Each console features an insulated polyethylene baitwell, rod holders, stainless steel handrail, and rear door for easy access to batteries and wiring.

# RECORDS ARE MADE TO BE BROKEN. WE LOVE BREAKING THEM.

For the 19th consecutive time, Skeeter has been recognized by the National Marine Manufacturers Association® (NMMA®) CSI program for "Excellence in Customer Satisfaction for Fiberglass Boats." The Marine Industry CSI Program honors companies that maintain a customer satisfaction rating of 90 percent or higher. Proof that our focus stays on you. What does this mean to you, our customer? It's a testament of our dedication to building the best quality product while providing excellent sales and service throughout your experience as a Skeeter boat owner. Your comments and suggestions enable Skeeter to provide continuous improvements, thereby enhancing your confidence that Skeeter and its dealers will remain your fishing partner for life.

Our Warranty  
is Second to None\*

LIMITED  
LIFETIME  
WARRANTY

- Limited Lifetime Structural Warranty
- 10 Year Limited Transferable Structural Warranty
- 3 Year Limited Component Warranty

\* Warranty Compared Against Three of Our Leading Competitors

- Skeeter offers the original retail purchaser a Structural Warranty that covers any major structural defects in the material or workmanship, for the duration of the ownership.
- Unlike most companies, **the Structural Warranty may also be transferred to the second owner for a full 10 years from the first retail purchase date.**
- Skeeter also offers a Component Warranty to the first retail purchaser, where certain factory-installed parts are covered for up to three years from the date of purchase. The Component Warranty may not be transferred to a second owner and is subject to limitations outlined in the 2020 Skeeter Fiberglass Limited Warranty.

For complete details, terms and conditions,  
visit: [SkeeterBoats.com](http://SkeeterBoats.com)

All Skeeter boats have been certified by the National Marine Manufacturers Association®, and meet all United States Coast Guard and American Boat & Yacht Council requirements.

To our national and international dealers and distributors—  
**WE THANK YOU**  
FOR BEING A PART OF THE SKEETER FAMILY.

### INTERNATIONAL APPEAL—LOCAL ROOTS

With 139 dealers in 39 states and international dealers and distributors in Canada, Japan, Mexico and South Africa, you're never far from your local Skeeter representative. Where there's water, you'll likely find Skeeter nearby.

The logo features a stylized 'SX' in a metallic, textured font, followed by the word 'SERIES' in a clean, sans-serif typeface.

**SX** SERIES

# PERFECT

## FOR BOTH FISHING LEISURE AND FAMILY LEISURE.

Do you prefer inshore or offshore fishing? Do you want a buddy boat or a family boat? Either way, bigger water means bigger fun with the SX series. Whether you're a casual fisherman or a pro guide – this line helps you get the most out of your time on the water.

## HOLDS ITS OWN SO YOU CAN HOLD MORE FISH.

The wider hull makes it smoother in big water, while the extra room gives you more space on deck to fish. Baitwells are large and easy to access. Good thing, because you'll need them.

## SKEETER BUILT® PERFORMANCE TRAILERS

Our optional Skeeter Built® Bay Boat Trailers are made with galvanized aluminum to withstand the rigors of saltwater and come back for more. They feature independent tandem torsion axles with brakes on each axle, Fulton® winch, sealed LEDs, reinforced bunks and crossbars, step-side fenders, swing-away tongue with non-skid tongue step and more.

Skeeter is building all of our trailers in our 43,000 square-foot facility in Kilgore, Texas. All Skeeter Built® Trailers come with an exclusive limited lifetime warranty.

# ENGINEERED TO BE THE ULTIMATE BAY BOAT.

## INSHORE OR OFFSHORE

Skeeter's SX Series has a model that's perfect for your family, your team and the way you fish. Visit [SkeeterBoats.com](http://SkeeterBoats.com) to find a dealer near you and schedule a demo ride.

# SX FEATURES AND OPTIONS

## THIS IS WHAT HAPPENS when you don't rest on your laurels.

The spirit of innovation runs deep with us. That's why we keep striving to make the best even better. We ask what fishermen and families want, we listen to what they need, then we get to work. The result is a range of features and improvements that consistently keep Skeeter on top.

**1. Lean Post Baitwell:** 40-gallon baitwell with Skeeter plumbing is secured to the deck behind the lean post. Circular tank geometry and transparent gasketed lid helps keep your bait alive and fresh for an entire day of fishing. *Optional exchange on SX240 and SX230.*

**2. Deluxe Lean Post with Fixed Back Rest and Bolstered Seating:** Dual flip-up bolster seating includes integrated hinges, folding arm rests, flip-up foot rest, pro-series rod holders and grab handles. Includes an 80-qt. Engel® cooler. *Standard on the SX240, SX230 and SX2250.*

Portable toilet not included.

**3. Comfort Console:** Extra storage, access to the batteries, accommodates a changing area, and makes for a great day of fishing with the whole family. Includes a thirty-five quart Engel® cooler in front for additional seating. *Optional exchange on SX240, SX230 and SX2250.*

**4. 80-Qt Engel® Deep Blue Performance Cooler:** The number one rated cooler in the country. Features a full two inches of dense polyurethane foam for 8-10 days of cold-keeping capability. Air tight gaskets, marine grade latches, self-draining bottom, large non-skid, non-marking feet and molded hand grips with rope handles. *Standard on all SX models.*

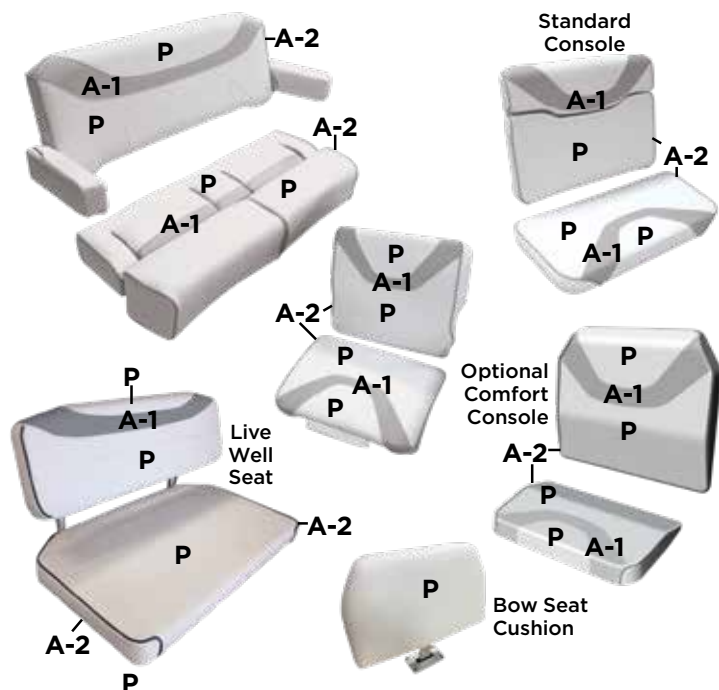

# SX UPHOLSTERY AND COLOR DETAILS

Our premium quality upholstery vinyls offer superior abrasion resistance. UV resistance for up to 1,000 hrs, mildew resistance, fire retardant and can withstand cold cracking to -10°F. We also use premium quality thread which outlasts cotton/polyester threads, is resistant to rot and decay and is guaranteed to last the lifetime of the upholstery.
